Two Year Old Angus Bulls

Moderate Framed, Calving Ease Bulls

High on \$EN

Dear Cattlemen:

Our bull numbers are up this year. By looking through the data you will appreciate that we continue to sell only our top cut of bulls. Take this opportunity to own a Two-Year-Old Angus bull from an established and reputable herd.

With 85 years of breeding continuous cow families combined with three generations of Angus knowledge you can buy with confidence. Efficient cow lines have emerged by staying on track, avoiding fads and being committed to raising fault free cattle.

Our cows earn their keep by working hard for us as we develop bloodlines that will add value to the herd. When you purchase a bull from us, you are purchasing a program with profitable traits that you cannot find sifting through the numbers. There are no epds available to measure the most important economic traits such as fertility, mothering ability, disease resistance and calf survivability. This bottom line of profitability is something we take seriously.

Selling from these hard working cows are the very top of our 2009 bull crop. All are virgin bulls with the exception of one bull we used within our own herd. The bulls were summered on grass with no supplemental feed until the first part of November. At the present time they are being fed a high roughage ration in a quarter section pasture with plenty of room to run. Our customers appreciate the way our bulls are managed resulting in sound, range ready bulls.

Our customers will be pleased to know that our cow herd is genetically Free of AM, NH and CA.

It is always a pleasure to see old friends, and meet new ones on sale day. Be sure to call if you have any questions about the bulls.

Sincerely,
Mike Sitz

MSAR Forte 6776

MSAR Right Time 7757

MSAR Forte 6776 is everything we had been searching for in a bull, and we found him at home. He breeds extremely consistent where out of 60 head of 6776's 2009 calf crop, only four were culled at weaning. Forte 6776 is structurally correct and stylish, working well on all types of cattle. At yearling his sire group of calves proved to be the most consistent, balancing out all cow types. 6776's bloodline traces back to PAPA Forte 1921, one of the great carcass bulls of the breed, and his dam, 1029, is considered the best cow ever raised on this ranch. 6776 is not a single trait bull, but doing it all well, and being a cow maker may well be his best trait. Forte 6776's calves are extra vigorous at birth and the bull also has a good disposition. The dam is a Pathfinder cow having a BR of 8/96, WR of 8/108 and YR of 7/109.

MSAR Right Time 7757's sire, 24J, is known as the Cow Maker, producing easy fleshing, feminine daughters with excellent udders. MSAR Right Time 7757 was the high selling bull in our 2009 Sale. We first used this bull as a cleanup bull when he was a yearling and his first daughters were bred the spring of 2010. His daughters are sharp and feminine and have the look of good producers. We have used this bull successfully on heifers as a calving ease AI sire in 2009. Right Time 7757 is from the Msar Proud Formera 1029 cow and a half brother to our MSAR Forte 6776 bull. The dam is a Pathfinder cow having a BR of 8/96, WR of 8/108 and a YR of 7/109. MSAR Right Time 7757 has more calving ease and slightly more style than her Forte son.

—CAR Chinnook 786

CAR Chinnook 786 is a calving ease bull and this will be the first time we will have included Chinnook sons in our annual sale. We were first attracted to Chinnook's flawless pedigree and his six generations of documented maternal strength. Chinnook is very stylish and slightly larger framed than our Forte and Right Time sires. As an outside AI sire, he is one of the most consistent bulls at weaning that we have used in a long time, stamping each calf with his excellent disposition, eye appeal and thickness from start to finish. Owned by Darwin Peckham, Bristol, SD and raised in the Connelly herd in Montana, Chinnook is the product of a 50 year breeding program that has focused on fertility, longevity, performance, carcass and maternal strength.

Calving Ease Direct (CED) is an EPD expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first calf heifers. It predicts the average difference in ease with which a sire's calves will be born when the sire is bred to first calf heifers.

Calving Ease Maternal (CEM) is an EPD expressed as a difference in percentage unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.
