

MIKE SITZ ANGUS

JOEL JOHNSTON ANGUS

49th Annual Bull Sale

Monday | February 7TH 2022 | 1:00 (CST)
Burwell Livestock Market | Burwell, Nebraska

MIKE SITZ ANGUS RANCH

www.mikesitzangus.com

Dear Cattlemen,

The most important elements of functional and profitable cattle are hard to measure and complicated to explain. With all the countless numbers available it still does not replace the day in and day out hands on experience within our own cowherd. With this knowledge, coupled with over 50 years of Angus Herd Improvement Records (AHIR), we can help with the bull selection process. By drawing from the personal understanding of our herd, one can be confident that we are able to help find the bull best suited for your program.

Maternal genetics have been at the heart of the MSAR breeding program for generations, and we are offering sound, functional, eye appealing bulls from these proven cow families. You will find a consistency that can only be found from generations of selective breeding.

The Mike Sitz and Joel Johnston Angus bull program is unique to most of those in the industry by marketing exclusively top Coming Two-Year-Old Virgin bulls that are raised under range conditions.

Our bull crop goes through a nearly two-year- long culling process, beginning at weaning, another at yearling, and then the final evaluation before the bull sale. Only the top of our 2020 calf crop have been retained for our bull sale.

The bulls are developed primarily on grass with the goal of developing long-term soundness. We do not supplement their Sandhills summer pasture, so those bulls that perform on grass are more easily evaluated.

In the spring the bulls are trailed 11 miles to their summer pasture, where they are supplemented with only salt and mineral. Then, back home again in late October, where they continue to range on a quarter section pasture. At this time the bulls are started on a high roughage ration consisting of prairie hay, modified distiller grains, and a little corn.

Since our bulls spend nearly all of their lives on pasture, they are more apt to stay sound longer. Ask any of our repeat customers – they will say the same: soundness and longevity are definite pluses in our program. Our returning customers are the backbone of our bull sale success and they appreciate how the bulls are presented.

We look forward to seeing old friends on sale day and meeting new ones. The best part of this business are the people we meet.

Please feel free to call if you have any questions, or to set up an appointment to visit the ranch to look at the bulls.

Sincerely,

Mike and Debra Sitz & Family
Joel, Bethany & Jordee Johnston

MIKE SITZ ANGUS RANCH

84711 460th Avenue, Burwell, NE 68823

Monday, February 7, 2022 - 1:00 (CST)
Burwell Livestock Market, Burwell, NE

Contact:

Mike Sitz: 308.348.2273 (H)

Joel Johnston:

308.348.2010 (H), 308.645.7134 (C)

Sale Day/Sale Barn Phone: 308.346.4257
or Joel Johnston: 308.645.7134 (C)

Location: The sale will be held at the Burwell Livestock Market, Burwell, Nebraska. The barn is located in the southwest part of town, west of the water tower, at 401 S 11th. **Bulls will be trucked in the morning of the sale.**

Questions: Please feel free to call with questions. You are welcome to visit the ranch prior to the sale to inspect the bulls. If you would like to check out the bulls at the ranch, give Mike a call: 308.348.2273 or Joel: 308.348.2010

Absentee Bids: If you cannot be with us sale day, we will confidentially and honestly handle any bids for you. Call Mike Sitz at **308.348.2273**, Joel Johnston at **308.348.2010**, Mike Baxter, Auctioneer, at **402.387.1861 (H)**, or **402.394.5686 (C)**. On Sale Day, call the Sale Barn at **308.346.4257**.

Storm Date: Is set for Monday, February 14th. In case of severe weather, call Mike, 308.348.2273 or Burwell Livestock Market, 308.346.4257 about the possibility of a sale postponement.

EPDs are updated weekly. The epds in this catalog are as the week of November 29th, 2021.

Accommodations:

Rodeo Inn, Burwell, 308.346.4408
Sandhill Suites, Burwell, 308.346.4964
Pump and Pantry Motel, Burwell, 308.346.4607

TOP COMING TWO-YEAR-OLD VIRGIN ANGUS BULLS MODERATE BULLS FROM A TIME PROVEN COWHERD.

Herd Health: All bulls have tested negative for BVD. Bulls were vaccinated with IBR, BVD, PI3, BRSV, 7 Way Blackleg and are poured.

Semen Evaluation: All bulls have passed a fertility and breeding soundness exam evaluation by Dr. Terri Bridgman, Burwell, NE - 308.750.9128. This test includes semen analysis for vigor, concentrations, morphology and percentage live. Also, included is an examination for physical defects such as abnormal testicles and warts. Scrotal circumferences are taken at this time. If there are any problems, the bull will not be sold.

All are virgin bulls with the exception of the two we used for clean-up and those are Trich tested.

Delivery: Free delivery within Nebraska on total purchases of \$3000 or more. We will assist all buyers on delivery. If you bring your own trailer, we will deduct \$50 per bull on sale day.

Retained Interest: Mike Sitz Angus (MSAR) or Joel Johnston Angus (JJA) is retaining 1/3 semen interest on all bulls. Buyer has full possession.

Terms and Conditions: The cattle selling in this auction will sell under the Terms and Condition of the American Angus Association. All cattle are the buyer's property as soon as sold.

Liability: Mike Sitz, Joel Johnston, or Burwell Livestock Market assumes no liability, legal or otherwise, for any accident that may occur on the sale premises.

First Breeding Season Coverage: See page 25 for details.

This sale will be broadcast live on the internet.

DVAuction
Broadcasting Real-Time Auctions
Real time bidding & proxy bidding available.

DV Auction Online Bidding: Online bidding is available through DVAuction.com. Please register on DVAuction **at least 24 hours prior to the sale**. A full-time support team can be reached at **402.316.5460** or contact representative Tami McIntosh, 308.870.3661. Sale will be broadcast live on the Internet. High-speed internet is required. Real time bidding and proxy bidding available.

PREVIEW BULL VIDEOS AT WWW.MIKESITZANGUS.COM OR DVAUCTION.COM

1. Create an account at www.dvauction.com under "create new account" tab.
2. Click "apply for bidding" in the top upper left corner of your screen, **at least 24 hours prior to the auction.**
3. Tune into the sale and make your purchases!

High speed Internet is required for successful bidding. Be sure to check the lag-time monitor in the top left corner to ensure real-time broadcasts.

Proxy Bidding: If you cannot make time to watch the sale, register a proxy bid and let our system represent your bid while you are away. Look for the "**Max Bid**" tab on the auction listing and place your maximum bids. DVAuction will handle the rest!"

Having troubles? During the auction, you can type a message to the operator at any time for assistance. DVAuction's full-time support team can also always be reached at **402.316.5460**.

MSAR Right Time 7757's sire, 24J, is known as the Cow Maker, producing easy fleshing, feminine daughters with excellent udders. We first used MSAR Right Time 7757 for cleanup as a yearling and his first daughters were bred in the spring of 2010. Twelve years later this bull continues to be on the top of our "go to" AI sire list for producing sharp, feminine, good producing daughters with longevity. This bull's dam is MSAR Proud Formera 1029, and he is a half-brother to our MSAR Forte 6776 bull, a Pathfinder Sire. She is a Pathfinder cow having a BR of 9/95, WR of 9/106 and a YR of 9/106.

Do not overlook 7757's sons and what they can achieve for your herd.

Coleman Charlo 0256 is a proven calving ease sire. He is stout, deep ribbed, and an easy fleshing power house, stamping each calf with eye appeal, thickness, and muscle expression. He ranks in the top 5% of the Angus breed for \$EN and top 20% for \$W. His daughters have beautiful udders, are easy fleshing, wide based, and deep sided. With his balanced EPD's and positive \$EN, he produces daughters that are efficient and profitable. He will add capacity and fleshing ability to a set of replacement heifers, and stouten up a set of sons. Charlo progeny have good feet and move effortlessly.

MSAR Game Day 4042 is a prolific breeder, easily maintaining his weight on grass during the breeding season. 4042 has the right frame score to produce functional and efficient females with great udders, yet still produce calves with good muscle expression and thickness. Year after year, it has been easy to pick out his straight, uniform calves which have consistently grown up to be eye appealing, easy fleshing cattle with great dispositions.

MSAR Game Day 4042 has 10 Pathfinders in his three-generation pedigree, and a history of longevity is evident in the high producing cows found on his maternal side, including "Old 827" with her 17 calves on record. His maternal grandsire, MSAR Forte 6776, is a Pathfinder Sire and another one of our home-raised bulls.

If you are looking to extend your grazing season -- and your pocket book -- with a moderate and stylish cow, this bull will produce the type of cattle you are seeking in a complete package. MSAR Game Day 4042 is a perfect example of why we use our own bulls to make cows.

STANDING THE TEST OF TIME

For nearly a century the Sitz family has been involved with Angus cattle.

Marshall Queen, Blackbird, Evidences Eppionia, Erica Ellen, Proud Formera, Dora, and Emma E are cow families found in our herd today, that all trace back to Grandparent Will and Frieda Sitz's seven original cow families purchased in 1923. **One hundred percent of our present-day cowherd are direct descendants from these original cow families.**

Our cowherd is a family treasure and we regard it as such. By working within the boundaries of these bloodlines, we have a consistency that can only be achieved from generations of selective breeding. Efficient cow lines have emerged by staying on track, avoiding fads and being committed to raising fault free cattle. **For 99 years our Time Proven Cowherd has stood the test of time.**

A A R Creed 5802 is a Thunder son with calving ease, performance, and maternal efficiency. Creed is backed by multiple generations of proven cows in the Arntzen herd. He is a calving ease sire with an outcross pedigree. The Creed sons we raised have a lot of growth, muscle expression, and are high capacity, with many being suitable to use on yearling heifers. He is in the top 10% for Docility and top 15% for Heifer Pregnancy. He has moderate milk and is in the top 4% for Birth Weight at -2. His progeny are standouts. Creed will create hard-working cattle for all segments of the industry.

WHY DO WE USE OUR OWN BULLS?

We use our own genetics because we trust our program. We take our most outstanding genetics, and stack those as a way of locking in and enhancing desirable traits.

Using our own genetics has also helped us avoid genetic defects, breed true and attain genetic purity.

PATHFINDER

A SEARCH FOR SUPERIOR COWS

The Pathfinder Angus program began in 1978 in an effort to identify superior cows in the breed who have excelled in production based on their records of performance from Angus Herd Improvement Records (AHIR). In identifying these superior cows, emphasis is placed on early puberty, breeding and early calving followed by regularity of calving and above-average performance of the offspring. The Pathfinder Report requires a minimum of three calves from a cow to determine her regularity of calving and the ability to produce superior calves for weaning weight year after year. A sire that qualifies with five or more Pathfinder daughters becomes a Pathfinder Sire.

Pathfinders are designated with a # on the pedigree.

MSAR Emblazon 2092 is a son of MSAR Emblazon 4086. We had used this bull prior as cleanup when he was a yearling, then purchased him back as a seven-year-old, using him to pasture breed and to use AI. One of his most notable characteristics is the way he moves. He is an impressive, **free moving bull** that travels well with great feet and legs.

A proven calving ease bull. He is a thick, deep bodied, and moderate framed bull, consistently producing progeny with high weaning and yearling weights. He surpasses the outside AI bulls we have used, being extremely consistent with everything we desire in progeny. He makes us good cows with great udders and fleshing ability, good weaning and yearling weights, and sons that have a lot of muscle shape and extra length of body--- and most importantly, we get these characteristics consistently year after year.

MSAR Emblazon 2092 would rank in the "easy keeping" and "easy fleshing" category. While a prolific breeder, he maintains his weight on grass during the breeding season. To top it off, his progeny follows his temperament of a nice disposition.

MSAR Game Day 4042 – 7042 was chosen to keep back as a herd sire because of the stacked generations of longevity and fertility on both the sire and dam's side. Both his dam and granddam continue in the herd with production of seven calves and ten calves on record. 7042 is a really good-looking bull, being thick and sharp. 7042 was injured fighting and we had to sell him, but we thought enough of his sire and dam to keep a full brother back to use in our herd.

- High Wean and Yearling Ratios.
- Dam has a great udder.

OUR BULLS ARE MORE EASILY EVALUATED

When you attend our sale, **our bulls are more easily evaluated** because conformation faults are not hidden behind high camouflage fat. We all know when it comes to bull marketing – to put it simply – fat sells. **We avoid the negative effects of overfeeding in relation to the long-term health of the bull.**

FIRST BREEDING SEASON COVERAGE

All bulls selling for \$3000 or more will be covered 50% by Mike Sitz Angus and Joel Johnson Angus if they are injured during their first breeding season. First breeding season is defined as the 60- day period following the first turnout of the bull on injuries that occur in the breeding pasture. 50% of the value of the injured bull, minus one-half salvage value, will be given as a credit in a future sale or toward a replacement bull if one is available. As a two- year-old bull, the minimum salvage value will be valued at \$1350. Salvage value will be split equally between Mike Sitz Angus and the buyer. A veterinarian must diagnose all injured bulls. Please notify us as soon as possible should an injury occur and prior to the injured bull being sold for salvage. All claims must be made by September 1, 2022. This is not mortality insurance. This does not cover poor management or neglect.

Maternal Weaned Calf Value (\$M) is the most maternally-focused selection index currently available to Angus members and commercial users of Angus genetics. \$M, expressed in dollars per head, aims to predict profitability differences in progeny due to genetics from conception to weaning. \$M places greater emphasis on the cost side of commercial cow-calf production than any tool available in the past. Increased selection pressure on \$M aims to decrease overall mature cow size while maintaining weaning weights consistent with today's production.

BULL MANAGEMENT

In mid-October, the bull calves are weaned, and go back out on native range with salt and mineral. Their ration is distiller's cubes and winter range, to gain two pounds per day. In late winter the bulls are put on a high roughage ration of ground prairie hay, modified distiller grain, and a little corn, to gain 2 pounds a day. As yearlings, the bulls graze native range and bottoms of cool-seasoned grasses, supplemented only with salt and mineral. In mid-October, pre-sale, they begin a high roughage ration consisting of prairie hay, modified distillers grains, and a little corn.

WHY DON'T WE CREEP FEED?

Developing our calves without creep gives us a more accurate record of what the cow is actually producing. Is she raising a big, healthy calf on her own? Is she keeping adequate flesh doing so? Is she breeding back on time? These questions about the cow herd cannot be accurately answered with the utilization of creep feeding, or the use of other supplements.

What is the benefit of this practice to you? If your aim is to reduce production costs and also keep replacement heifers, you will benefit from our rigid culling practices. The more rigidly we cull and sort our own herd the more likely you are to reap the future rewards of a functional, economical cow herd of your own by using bulls from these productive cows. Added production coupled with fertility and longevity with less feed is more dollars in your pocket.

HEIFER AND COW MANAGEMENT

After weaning, the heifer calves winter graze in the hills, have salt and mineral, and are supplemented with a distiller's cube to gain one pound per day. They will receive prairie hay when the winter grazing is short or covered with snow.

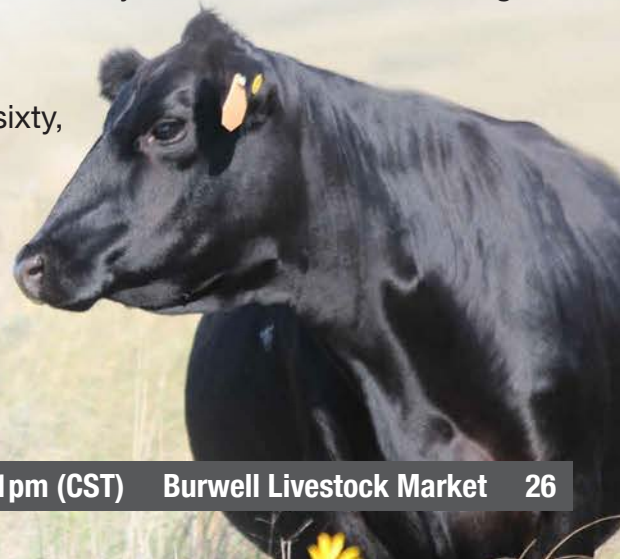

In June heifers are synchronized, heat detected, and artificially inseminated. A calving ease bull is turned in for 30 days. After pregging, all open heifers are sold.

Once calves are weaned, the cows are wintered on range and meadow regrowth supplemented with distillers cubes. Prairie hay is fed in January, once the native range is short.

At calving, cows are on pasture, and supplemented with cake and prairie hay. At birth each calf is caught and hand-weighted with a scale for their actual birth weight.

In June, the cows are synchronized, heat detected, and artificially inseminated. Cows and first calf heifers are sorted into bunches of sixty, and each bunch has a bull turned in with them for forty-five days. At the end of October, females are preg checked and all opens are sold with no second chances.

Throughout the year, we constantly evaluate feet, udders, disposition and performance.
